Glass fusing is the melting together of different pieces of glass that are compatible with each other. This workshop will teach you how to make a small dish or tiles. We will cover glass cutting, compatibility of glasses, and firing processes. The glass has to be fired overnight and cooled completely.

Students will use glass tools & basic materials supplied by the instructor for this workshop. *****The glass is not included in the class fee. Glass may be purchased from the instructor for \$20.00 or more depending on the size of each project you choose to make.**

Hint: to keep glass costs down work small while you are learning.

Please bring along drawings or pictures or just your imagination to design your pieces. Students can bring their own cutters or hand tools if they wish. Bring any drawing tools that may help in making your designs. The first class we will start by doing some tests and learning about some of the possibilities in glass. Relax we will have fun! Jewelry pliers - round nose, and small wire cutters, if you have them, would be great to bring along. **PLEASE NO OPEN TOED SHOES!!!!**
